Dr. Shikako-Thomas is an Assistant Professor in the Occupational Therapy program at the McGill University School of Physical and Occupational Therapy in Montreal, Canada, and an associate member of the McGill Institute of Health and Social Policy, and the CanChild Centre for Childhood Disability Research. She obtained her PhD in Rehabilitation Science at McGill University and her BSc in Occupational Therapy at University of Sao Paulo, Brazil. She pursued post-doctoral training in Knowledge Translation in policymaking for children with disabilities at McMaster University and in Knowledge Translation in policymaking in Environmental Design and Accessibility at University of Montréal. Her research focuses on the promotion of healthy living and participation for children with disabilities. Her research program adopts a participatory methodology to engage different stakeholders, including policymakers, children and their families, in finding solutions to change the environment, inform policymaking and promote participation of children with disabilities in different life roles and activities. She has contributed to the UNICEF Manual on Childhood Disability in Low and Middle Income Countries. She co-leads and participates in a series of knowledge translation initiatives, including CHILD LeisureNET, a network of over 200 stakeholders in Canada developing solutions and strategies to promote leisure participation for children with disabilities, the childhooddisability.ca website, aimed at disseminating research information in an accessible format for users, the Knowledge Translation strategic planning for physical rehabilitation in Québec, and the NeuroDevNet Knowledge Translation core.
